New Thinking requires an evolution in how people learn, collaborate, and gather information. SMARTdesks and Empowering Energy help you set the stage for productive, interactive group dynamics.

Groups have always assembled for academic, business, or social interaction—the gamut of reasons is endless. However, now there is more than a group of people in the room—there is the internet. The use of this inexpensive infrastructure for global interaction shapes the arrangement of the people in the meeting space.

Access to knowledge is power. Through the internet, all individuals and groups share an equalized power base. In this context of web-based interaction, how do these constituents sit around the table? How do they get things done? How do they learn? Collaborate? Reach consensus? Grow and prosper?

We explore the interaction between people and technology. The result is a collection of groundbreaking products which advances the new thinking of educators, business leaders, science and healthcare industries, and governments. Each entity has a common, overarching goal: to communicate face-to-face, share data and interact using online technology. We help them reach that goal.

Thank you for being a “New Thinker.” We look forward to learning about your goals. We will work with you to develop the best solution based on your specific needs. You are not limited to our standard product lines. If necessary, we will modify our products or develop new ones to make your environment as productive as possible.

Terms and Conditions

Orders

Distribution of the CBT Supply, Inc./SMARTdesks price list does not, in itself, constitute an offer to sell. Orders can only be placed using a certified contract quotation generated by CBT Supply, Inc./SMARTdesks directly or through an authorized dealer. CBT Supply, Inc./SMARTdesks products are openly traded and dealer projects are protected. All CBT Supply, Inc./SMARTdesks Dealers are advised to register each project at the initial quote stage to avoid any conflict with our direct sales policy. CBT Supply, Inc./SMARTdesks will respect and protect each dealer-initiated project so registered. Contact CBT Supply, Inc./SMARTdesks via email (sales@smartdesks.com) for additional information concerning project and customer registration. Orders and transactions conform to standard business practices using secure communications. Ordering may be initiated with CBT Supply, Inc./SMARTdesks by the following means:

Online: www.smartdesks.com
E-mail: sales@smartdesks.com
Postal Service: P. O. Box 391, Hibernia, NJ 07842-0391
Toll Free Voice and Fax: 800-770-7042 (973-586-2783)
International Voice and Fax: 410-779-9989

All quotes are based on U.S. dollars.

Quotes are valid for 30 days.

Quotes for foreign customers outside the U.S. do not include additional custom fees or taxes.

Additional Custom fees, taxes, duty fees are the responsibility of the customer to pay.

Custom orders and orders shipped outside the USA 48 contiguous states will require additional lead time.

Inside Delivery, Assembly or Installation quotes are based on standard pricing. It is the responsibility of the customer to notify CBT Supply if you have the following condition:

1. Prevailing or Union Wage requirements that apply to any delivery, assembly or installations including any special building requirements, specific minimums, or requirements for the Installer's Certificate of Insurance.
2. The quotation will be modified to reflect the conditions of (1.)

To place your order:

- Log-into your quote: www.iquote.smartdesks.com/qq using your email address and quote #

- Complete the requested information below.

Accounts Payable contact name, phone, email and fax

Billing Address

Shipping Address

Delivery contact name, phone, email, and fax (primary contact and backup contact)

- Print the quote and sign it.
- If you generate a Purchase Order, please attach it to the Quote.
- Send us a copy of your state tax exempt/resale certificate if appropriate, otherwise you may be charged sales tax.
- Upload all documents to your quote (or fax all pages to 800-770-7042 or send via email to: customerservice@smartdesks.com)

Payment Terms

Standard Payment Policy

Standard terms are 50% deposit and balance due prior to shipping. Orders under \$3,000 require prepayment. Payments are accepted in the form of Credit Card, ETF, or Check. It is the Customer's responsibility to pay all applicable Sales and Use Tax to the State when Sales and Use Tax does not appear on the Invoice.

- Individual and pre-installed electrical connections, connection boxes, electronic components require payment prior to shipment.
- All terms are subject to the discretion and final determination by CBT Supply Inc. d/b/a Smartdesks.

Individual and pre-installed electrical connections, connection boxes, electronic components, and all custom furniture

items are not returnable or refundable. All other items are subject to inspection for damage via photo documentation or reason for return before Seller will consider return or refund. All Returns require a Return Authorization number. A Restocking charge will be applied.

International Orders

Prepayment is required. All pricing is in U. S. dollars. Shipments are FOB Origin. Customer is responsible for arranging shipment.

- Please provide address and contact information for your Freight Forwarder or Carrier on the Quote Console using your quote # and email address to sign in: <http://iquote.smartdesks.com/qq/>
- If you are using a broker please provide address and contact information for your broker on the Quote Console using your quote # and email address to sign in: <http://iquote.smartdesks.com/qq/>
- Customer is responsible for all taxes, duties, fees, storage charges, and shipment charges associated with the order. Customer is responsible for all customs processing and clearance.
- Customer to notify and provide information to Seller for Customs Documents Required. Seller will not refund payments for goods that are refused for delivery at customs.

Payments via Credit Card, Check or EFT/ACH wire

- To place your order you must provide a signed quote. If you are also providing a purchase order, it must match the quote. Please upload your quote and purchase order to the Quote Console using your quote # and email address to sign in: <http://iquote.smartdesks.com/qq/>
- Credit card payments: Our Accounting Department will send a link to our online bill pay service with the Invoice or Proforma Invoice for a deposit: <https://iquote.smartdesks.com/portal/LoginForm.php>. Use your email address and the Customer# and Document# in the email you receive from the Accounting Department.
- Giving your credit card information to accounting does not automatically place your order.
- Send checks to the address below: Our Accounting Department will send a link to our online bill pay service for you to print the Invoice or Proforma Invoice. <https://iquote.smartdesks.com/portal/LoginForm.php>. Use your email address and the Customer# and Document# in the email you receive from the Accounting Department. Inside the portal click on the Invoice# to view and print your invoice.

- ACH/EFT/Wire Information: Contact accounting@smartdesks.com, 800-770-7042 ext.812 for wire information.

Product Specifications

CBT Supply, Inc./SMARTdesks reserves the right to make changes in design, specifications and construction of products offered, or to discontinue products without prior notice. Dimensions are approximate and are within normal industry tolerances. Please request review of your floor plan by our design department if necessary.

Order Review

The customer has the final responsibility of order review. Upon receipt of order, CBT Supply, Inc./SMARTdesks will process the order and will send the customer an email acknowledging receipt of order. It is the customer's responsibility to review the quote for accuracy, and to notify CBT Supply, Inc./SMARTdesks within 72 hours regarding any errors in the order. After 72 hours a non-reply will constitute acceptance of the order as written. CBT Supply, Inc./SMARTdesks will not accept responsibility for any changes to the order if the customer does not exercise his responsibility to review the order within the specified 72 hour time frame. **This is a customer responsibility.** CBT Supply, Inc./SMARTdesks does not assume responsibility for errors caused by miscommunications from the customer.

Cancellations

Each SMARTdesks product is made to customer specifications and is not considered a stock item. All orders are considered special orders. Once the dealer or customer has accepted the quotation, signed and placed the order, the order may not be cancelled unless approved by Seller. Seller shall not accept cancellations once production begins. Seller reserves the sole right to approve an order cancellation. Order cancellations approved in writing by an authorized manager of CBT Supply, Inc./SMARTdesks may be subject to reasonable additional charges to the dealer or customer, which shall be assessed by and at the discretion of CBT Supply, Inc./SMARTdesks at the time of work stoppage. Such charges incurred may include but are not limited to reasonable administrative fees, materials, labor, shipping, freight, and other costs associated with the order.

Change Orders

Upon Seller's acknowledgment of an order, Seller reserves the right to refuse a change order. Change orders must be requested within 72 hours of placing the order for purchase. Upon commencement of order production, Seller will not accept change orders on special or custom items. Before production begins, Seller will make a reasonable attempt to accommodate the requested change order. The following conditions apply:

1. Changes must be submitted in writing and require a signed, revised purchase order. Seller reserves the right to apply reasonable additional charges for materials, labor and administrative costs incurred as a result of the change order.
2. Seller reserves the right to reschedule completion and ship dates as may be reasonably required to accommodate production of the accepted change order.

Shipping

All shipments are Free On Board (F.O.B.) point of shipment. Shipment is property of the customer once it leaves the factory. Shipping charges are quoted in the order.

Normal delivery hours are 8:00 a.m. to 5:00 p.m., Monday through Friday excluding holidays. Any delivery arrangements made outside of normal delivery times or deliveries refused during normal delivery times are subject to additional charges. Special delivery requests (i.e. lift gate, inside delivery, non-dock and installation services) result in additional charges and must be specified in the order. Any charges due to failure to meet shipments, re-routing while in transit, non-commercial delivery or carriage storage charges are the responsibility of the customer. Contact the CBT Supply, Inc./SMARTdesks sales department for estimated charges. There will be a minimum inside delivery charge of \$100. The final charges will be determined by the carrier/installer.

CBT Supply, Inc./SMARTdesks will do everything possible to insure your order arrives in good condition and on time. CBT Supply, Inc./SMARTdesks is not responsible for freight damage or delays. All furniture is carefully inspected and securely packed before shipment. The carrier will only accept packages in good condition and agrees to deliver it in the same condition. CBT Supply, Inc./SMARTdesks relinquishes all responsibility for goods shipped upon a signed receiving document from the carrier. If the shipment is not delivered in accordance with the quantity of cartons and packages shown on the Bill of Lading and/or Freight Bill, do not accept it until such shortages are noted on both documents. **When you receive your order and sign the Bill of Lading you should always note "Accepted, Subject to Inspection",** since concealed damage is not discovered until you have unpacked the material. Any freight damage must be reported within a 14 day period after you have accepted the delivery to file a freight claim. If an item has been damaged, note the damage on the delivery receipt document and file a claim with the transportation company. In the event of concealed damage, notify the carrier within 14 days of receipt and request immediate inspection. All cartons and packaging must be kept with the merchandise at the delivered location. **Failure to do so constitutes acceptance and a waiver of any such claim.**

CBT Supply, Inc./SMARTdesks shall not be liable for loss, damage or delay resulting from causes beyond its reasonable

control, including but not limited to fire, strike, inclement weather, accidents or delay in transportation. In the event of delay, due to any such cause, the delivery date will be postponed.

CBT Supply, Inc./SMARTdesks will not accept the return of any merchandise without a Returned Material Authorization number (RMA). Please contact our Shipping Department at shipping@smartdesks.com (800-770-7042, international: +1-410-779-9989) for further instructions. Special order items may not be returned for credit. No returns will be allowed after sixty (60) days from the ship date. If merchandise is approved for return, a restocking fee will be applied. Upon receipt, all returned merchandise will be thoroughly inspected, and any damage will result in an adjustment to the amount of credit issued. The customer is responsible for return freight costs and is liable for freight damage.

Storage charges commiserate with the expenses incurred by CBT Supply, Inc./SMARTdesks will be assessed for customer requested delays beyond 30 days of the original, acknowledged shipping date.

Electrical Disclaimer

Due to local codes and regulations, CBT Supply, Inc./SMARTdesks cannot make electrical recommendations for facilities. Please contact a certified electrician. Installation services arranged by CBT Supply, Inc./SMARTdesks do not include electrical connections.

Warranty

CBT Supply, Inc./SMARTdesks warrants that its products are free from defects in materials and workmanship to the original owner, given normal use and care within stated limitations. Proof of delivery is the only official document accepted to verify any claim. In the event that a product is used more than normal use, the applicable warranty period may be reduced. To be covered under warranty, products must be installed according to CBT Supply, Inc./SMARTdesks' installation/application guidelines and installed by authorized CBT Supply, Inc./SMARTdesks dealer or agent. CBT Supply, Inc./SMARTdesks assumes no responsibility for repairs to products sustaining damages resulting from end-user modifications, attachments to a product, misuse, abuse, alteration or negligence. This warranty is subject to limitations, exclusions and other provisions provided below:

- 25 years: High Pressure Laminate, Thermofused Melamine, Thermofoil, Metal Base Structures.
- 10 years: Mechanical Parts such as hinges, locks.
- 5 years: Pressure Cylinders.
- 1 year: Connector Boxes and Electronics

Variations in finishes are typical characteristics, in terms of color and texture, and these variations do not constitute defects in materials and workmanship. CBT Supply, Inc./SMARTdesks stands behind our quality products and will do everything possible to resolve any problems that might arise within the terms of this warranty. Products supplied by CBT Supply, Inc./SMARTdesks are covered under separate warranty by their respective manufacturers. CBT Supply, Inc./SMARTdesks does not extend the warranty period of products supplied beyond that of the manufacturer. For more information, or to file a warranty claim, please contact CBT Supply, Inc./SMARTdesks' Customer Service Department at 800-770-7042 (international: +1-410-779-9989).

Desks and Workstations

DT Series Computer Desks

Basic Desk with LCD mounted to stand or monitor arm

Desktop monitor computer desks hold all monitors and laptop computers. The screen is visible to student and instructor and convenient for shared computing where line-of-sight is not an issue.

The simplicity of the DT Series Computer Desk is its biggest asset. Sturdy keyboard / mouse trays fully retract so the computer keyboard is out of the way when not in use. CPU bays keep computers off the top and off of the floor. The LCD can be on its own stand, giving plenty of room for use with textbooks. Grommets are used for channeling cables to the monitor, but may also be used for grommet mounted LCD arms.

The DT Series Computer Desk is available in single and double models. The models with keyboard tray are offered at 30" desktop height, and models without keyboard tray are offered at keyboard height: 28 inches.

A variety of monitor arms are available as options. Visit www.smartdesks.com for more monitor arms.

flipIT Metal Desks

Air flow cabinet design provides cool processing, wire management and appearance

These SMARTdesks Computer Desks are perfect for the computer classroom. Metal base cabinets offer long lasting performance at a modest price. The genuine, patented flipIT® display makes this a

multi-use desk because computer displays flip up for use and flip out of the way when computers are not in use.

Single flipIT desk with metal base

Double flipIT® Metal Desk with FIK-23 flipIT®, supporting VESA compatible 16:9 LCDs with case widths up to 23" / 590.5mm.

Specifications

- FIK-19 or FIK-23 flipIT rotating LCD display support systems (Patent # 7,784,412) (holds 16:9 widescreen VESA compliant LCD monitors)
- 26" x 8" keyboard/mouse trays with integrated mouse fence and wire management pass through
- CPU Rail on inside of desk back panel allows CPU Hanger placement anywhere along rail (rail is .75" x 1.5", order CPU Hanger separately)
- 1" x 1.5" steel wire management trough
- wire management grommets on sides
- MDF top finished with high-pressure laminate and edged in PVC trim
- steel base powder coated in Silver, Black Textured, Black Satin, or Putty
- 1.5" diameter heavy duty steel floor leveling glides
- locking casters optional

Base Colors

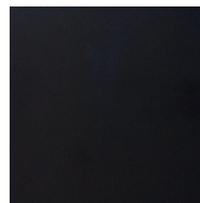

Silver

Black Textured

Black Satin

Putty

flipIT Metal Desks

FI Series: flipIT Metal Desks contain either the FIK-19 or FIK-23 flipIT unit. Desks have a CPU Rail inside for CPU Hanger placement anywhere along the rail (order CPU Hanger separately). Each desk has a 1" x 1.5" steel wire management trough and wire management grommets on sides. The top is finished with high-pressure laminate and edged in

PVC trim; the steel base is powder coated in silver, black textured, black satin or putty. Tables come with 1.5" diameter heavy duty steel floor leveling glides; locking casters are optional. The size of the desk is the middle 6 digits of the item number (in inches): WxDxH.

LT Series Laptop Computer Desks

LT Series Laptop Desks

Scaled for the best fit for individual workspace and overall classroom size, LT Series Laptop Desks support ergonomics of laptop use, connectivity to power and data, with integrated wire management throughout.

Available in singles, doubles and triples, LT Series Desks have side panel wire grommets which align to allow cables to pass easily from desk to desk. Large capacity NeatLinks wire management channels or optional WireWonders™ keep cables neatly organized.

Choose from a wide range of colors from famous name laminate manufacturers—all edged in through-color 3mm PVC. High-tone design styling for heavy institutional use.

LT Series Desks glide on 1" diameter floor levelers or optional dual-wheel locking casters for easy mobility.

Laptop Computer Desks

LT Series: Laptop Computer Desks come with one desktop power/data port per user. These desks do not have a keyboard/mouse tray. The student desks do not have CPU bays, however, the instructor desks do come with locking bays. All desks have 1" x 3" J style wire management channel (12 amp rated),

wire management grommets on sides; top surface finished with high-pressure laminate, base finished in melamine, 3mm PVC edge trim. Desks come with 1.25" steel floor leveling glides with .75" adjustment. The size of the desk is the middle 6 digits of the item number (in inches): WxDxH.

Loci™ Carrels

Computer Library Carrels for Testing and Study Privacy

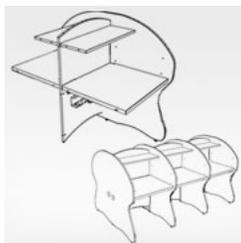

Library Computer Carrels by SMARTdesks are built for the educational setting, used as testing carrels, library carrels, school study carrels, and laptop carrels. This library furniture features selectable height for sitting or standing, with flipIT convertible desktops. The original, genuine, patented flip up computer display desk. These are endlessly modular computer carrels, having add-on study carrels to extend the units for best arrangement.

The top shelf is removed for use with the standing height setup.

Loci™ Library Carrels can be set up at your choice of three different heights:

- Laptop height (sitting) 28"
- Keyboard tray height (sitting) 30"
- Standing height 36"

The system is endlessly modular. Loci™ Library Carrels may be assembled at any length and the heights can be mixed or matched. flipIT® Convertible Desktops or Laptop Safes may be added as desired.

CPU holder is optional and ordered separately.

LED lighting Option

Energy saving LEDs bring task lighting intensity when needed. Permits general / ambient lighting to be lower for additional energy savings.

Loci Carrels

LC Series: The Loci Carrels come as Single or Back to Back units. You may purchase a standalone unit or combine units to create a row of carrels. The desktop surface comes with a wire management grommet, a FIK-19 or a FIL-18. The desktop surface is 26" deep and the top shelf is 11" deep. Each unit comes with one WireWonder18 per user and units have wire management openings in the sides. The

desktop and top shelf surfaces are finished with high-pressure laminate, side and back panels are finished in melamine or laminate, all edges are trimmed with 3mm PVC. At the time of installation each desktop surface may be configured for sitting or standing positions (28"-30" for sitting, 36" for standing). Single units are 30" or 48" W x 28" D x 48" H, Back to Back units are 30" or 48" W x 56" D x 48" H.

Mira Vista™ Classroom Desks

LCDs mount under glass top. Great for testing and privacy.

Mira Vista means “seeing the big picture.” Our glass top desk design has been updated with some important features to let you see your wide screen monitor with the clearest view possible. The tempered glass top is not tinted, therefore, you get the brightness and contrast of your LCD’s performance characteristics with the least amount of distortion. The CPU shelf is sized to work with thin client to standard tower case designs. Radius corners and side panel contours are friendly to hands and knees. Choose from a wide range of laminates to give your learning space the proper tone.

General Specifications:

- 1.18”(30mm) MDF tops, finished in choice of wood grain or color laminate
- Base finished in choice of wood grain or color melamine
- Edge banding 3mm flexible PVC
- Floor leveling guides, steel, 1.25” (31.75mm) diameter with 3/4” (19mm) adjustment
- 1” x 3” J-style wire management channel
- Side access grommets
- 26”x8” keyboard/mouse platform

Double desks offer space savings and economy.

Mira Vista Subsurface Desks

MV Series: Mira Vista desks allow you to see the monitor through the glass monitor window. They come with a tempered, clear glass subsurface monitor window with flat panel arm support for VESA compliant LCD monitor (accommodates monitors up to 20" diagonal, viewport is 19" wide); 26" x 8" keyboard/mouse tray with integrated mouse fence and wire management pass through; CPU bay. All

desks have 1" x 3" J style wire management channel (12 amp rated), wire management grommets on sides; top surface finished with high-pressure laminate, base finished in melamine, 3mm PVC edge trim. Desks include 1.25" steel floor leveling glides with .75" adjustment. The size of the desk is the middle 6 digits of the item number (in inches): WxDxH.

Semi-Recessed Monitor Desks

The FP Series Computer Desks positions the LCD monitor within the student's field of view, but below the horizon line, providing an unobstructed line-of-sight between student and instructor.

The FP Series Desks are particularly suited to present the iMac® screen in a semi-recessed position for unobstructed sight lines. Great access to connections and drive slot.

SFP-302628-xxx
Single FP Series Desk
Available in single, double, and triple configurations.

The shelf holds the iMac® on its own stand, with plenty of room to store keyboard & mouse. When used with the HD Cinema Display, the power supply and mini Mac® sit on the shelf for easy access.

Semi-Recessed Monitor Desks

FP Series: Semi-Recessed Desks are designed for semi-recessed monitor position. Desks have a monitor well with height adjustable monitor support platform (accommodates monitors up to 24" diagonal, opening is 23" wide); 26" x 8" keyboard/mouse tray with integrated mouse fence and wire management pass through; CPU bay. All desks have

1" x 3" J style wire management channel (12 amp rated), wire management grommets on sides; top surface finished with high-pressure laminate, base finished in melamine, 3mm PVC edge trim. Desks come with 1.25" steel floor leveling glides with .75" adjustment. The size of the desk is the middle 6 digits of the item number (in inches): WxDxH.

SS Series Desks

SS Series Down View Glass Top Computer Desks

LCDs mount under glass top. Great for testing and privacy!

SS Series down view glass top school computer desks offer the big picture: downview for wide screen LCDs, featuring under glass top, recessed monitor design. Tempered glass top is not tinted, so LCD color and contrast is better viewed. Downview computer furniture is great for testing without the need for privacy screens. Designed for institutional classroom use, applying ergonomics for comfort and ease of use.

Our downview glass top desk design has been updated with some important features to let you see your wide screen monitor with the clearest view possible. The tempered glass top is not tinted, therefore, you get the brightness and contrast of your LCD's performance characteristics with the least amount of distortion.

The CPU shelf is sized to work with thin client to standard tower case designs. Radius corners and side panel contours are friendly to hands and knees. Choose from a wide range of laminates to give your learning space the proper tone.

Go double to save space and money.

If your room layout allows the use of double desks, the cost per student goes down because fewer materials are used, compared to purchasing two single desks. If your room is especially small, or our standard sizes need to be modified in width to customize them for your space, we can make adjustments for you. That's because we build our products to order for you.

With SMARTdesks, you always have options. If you need some advice, make a design request and we can put together a floor plan without any additional cost or obligation. Together, we can make decisions about whether customization will benefit your classroom and purchasing objectives.

General Specifications

- 1.18" (30mm) MDF tops, finished in choice of wood grain or color laminate
- Base finished in choice of wood grain or color melamine
- Edge banding 3mm PVC
- Floor leveling guides, steel, 1.25" (31.75mm) diameter with 3/4" (19mm) adjustment
- 1" x 3" J-style wire management channel
- Side access grommets
- 26" x 8" keyboard/mouse platform

The LCD arm is robust 11 gauge steel, mounted to a solid poplar hardwood bracing member, so when you set the monitor position, it stays put.

Subsurface Monitor Desks

SS Series: SS Series Desks allow you to see the monitor through the glass monitor window. They come with a tempered, clear glass subsurface monitor window with flat panel arm support for VESA compliant LCD monitor (accommodates monitors up to 20" diagonal, viewport is 19" wide); 26" x 8" keyboard/mouse tray with integrated mouse fence and wire management pass through; CPU bay. All

desks have 1" x 3" J style wire management channel (12 amp rated), wire management grommets on sides; top surface finished with high-pressure laminate, base finished in melamine, 3mm PVC edge trim. Desks include 1.25" steel floor leveling glides with .75" adjustment. The size of the desk is the middle 6 digits of the item number (in inches): WxDxH.

Tables

Bilevel Computer Tables

Semi-recessed monitors for open sight lines in the classroom

General Specifications:

- MDF tops, finished in choice of wood grain or color high pressure laminate (HPL), matching or accenting PVC edge
- Steel channel model 205 legs offset-T shaped, 14 gauge steel, black nylon bullnosed end caps, wire management holes in one leg (wire management door optional)
- 1-inch x 3-inch J-style wire management channel (standard), WireWonder™ cable management system (optional)
- Modesty panel
- 6-outlet power strip, FC714 standard
- CPU holders optional

DBL-723030-VKX
Double Bi-Level Table with Semi-Recessed Monitor Placement.
Optional CPU holder shown.

Bi-Level Tables

BL Series: Bi-Level Tables are for semi-recessed monitor positions. The monitor pan is 8" d and adjusts 6-9" below table surface, suitable for monitors up to 23.5" wide (wider opening available). The tables come with a 12" modesty panel and offset-T shaped, steel legs with wire management holes (1.5" x 4" racetrack column in 13 gauge steel, 1.5" x 2" rectangular main bar in 11 gauge steel, black nylon bullnosed end caps), 1" diameter levelers, Tables may or may not have a keyboard tray and J shaped CPU holder. All

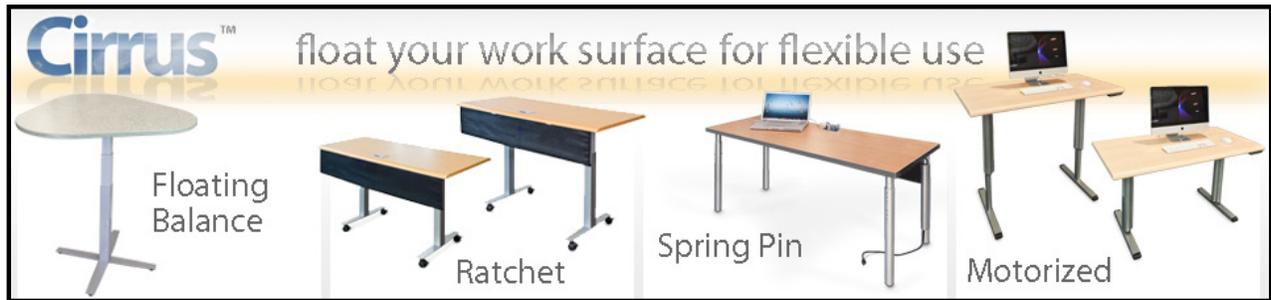

the tables include a 6 outlet strip with 10' cord, 1" x 3" J style wire management channel (12 amp rated), wire management access openings in monitor pan and top of modesty panel. The top is finished with laminate and PVC trim, modesty panel finished with melamine and PVC trim, legs and monitor pan are powder coated in mercury (dark silver). The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Cirrus Adjustable Height Tables

Float your work surface for flexible use

5 Top Shapes

Choose your top in laminate with PVC edge, or thermofoil with contoured edge.

Power/data and wire management solutions available.

Some table tops can use the Genu-flip or nesta mechanism to lift the table top for easy storage.

Ask us about all the exciting options available for the Cirrus line of tables.

TriCloud

Circle

Brainstorm

Square

Rectangle

Some rectangular Cirrus tables come with a mesh modesty panel with built-in wire management pocket. Solid modesty panels to match the table top are also available.

The Cirrus TriCloud is so named because it is shaped for up to three laptop users who can float to any common stratosphere together.

The Brainstorm Top fit four laptops for easy group brainstorming sessions. The outer curve of the brainstorm table nestles into the concave end of a Pi table for collaborative classroom arrangements.

A Variety of Adjustable Height Bases

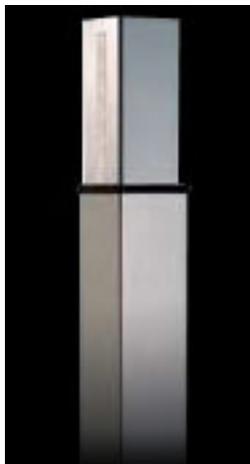

- Boomerang Post Leg with spring clip height adjustment
 - Ergo2 lift roller adjustable height leg (disk-base, square-base, X-base)
 - Ergo2 motor adjustable height leg (end base)
 - Ergo2 ratchet adjustable height leg (end base, X-base)
 - Escal8 lift roller adjustable height base (U-base)
- Fixed height legs also available.
-

Boomerang Post Leg with spring clip height adjustment

The spring pin adjustment of the Cirrus adjustable height laptop table makes this a practical choice when it might be used for different grades throughout its long service life. That's why it is a popular choice with K-12 schools. Adjust the height from 24 to 30 inches in one inch increments..

Ergo2 squared tubular leg

Lift Roller (Floating Balance)

The Cirrus floating balance adjustable height tables feature a pneumatic assist lift. The sure grip cable release is designed to operate safely without unintentional release. Smooth motion with no-bounce stopping.

Ratchet Lift

The Cirrus ratchet adjustable height table adjusts in 13 positions in 0.78 inch increments. Two people work together to change the positions by simply lifting the top. Resets to the lowest position when raised to the upper extreme. The leg height spans from 26 to 35.5 inches, a 9.45 inch range.

Motorized Lift

A no-nonsense motorized lift table. Infinitely variable heights: a range of 15.75 inches.

Escal8 squared tubular leg

Lift Roller (Floating Balance)

The Cirrus floating balance adjustable height tables feature a pneumatic assist lift. The sure grip cable release is designed to operate safely without unintentional release. Smooth motion with no-bounce stopping.

Order the Genu-flip or Nesta mechanism to lift the table top for easy storage

Cirrus Adjustable Height Tables

CR Series: Cirrus Adjustable Height Tables move from sitting to standing height, and virtually any height inbetween. Table tops come in 5 shapes: rectangle, triangle, circle, square and lobed (brainstorm). A variety of legs are available with manual or motorized height adjustment; fixed height bases also available. Tops are finished in either thermofoil or laminate

with PVC trim. Legs are powder coated steel. Some rectangular tables come with a steel frame mesh modesty panel with built-in wire management. Solid modesty panels are available. The middle of the item number is the size, either w x d x h or diameter x shape x height. VH stands for variable height.

DL Seminar 205 Tables

Laptop tables with power and data wire management

General Specifications:

- MDF tops, finished in choice of wood grain or color high pressure laminate (HPL), matching or accenting PVC edge
- Steel channel model 205 legs, vertical wire chase in one leg
- 1" diameter levelers (standard), locking casters (optional)
- Fold-down, removable 10" modesty panel
- 6-outlet power strip with 10-ft cord, 12 AMP
- Power/data ports to serve laptops (optional)
- flipIT® products optional, require 30" depth and minimum required width for installation
- 1" x 3" J-style wire management channel (standard), WireWonder™ cable management system (optional)

The DL Seminar Table is a versatile table design, shown here with laptops. Wire management comes standard. Power/data ports and flipIT® products optional. Other options include locking casters, CPU holders, WireWonder™ cable managers, keyboard/mouse trays for use with desktop monitors.

Available in single, double and triple configurations.

205 Style Leg: 1.5 x 4 inch racetrack column 13 gauge steel, 1.5 x 2 inch main bar, rectangular 11 gauge steel, black nylon bull nose end caps, floor glides, mounting bracket. One leg per table has wire management holes. Locking casters optional.

Wire Management Door Optional feature, replaces leg with wire management holes. One per table.

Model 205
Offset Leg with

DR Seminar 202 Tables

Laptop tables with power and data wire management

Great Laptop Labs and Computer Classrooms Begin with SMARTdesks Computer Tables

SMARTdesks Computer Tables are the most versatile computer training tables available. SMARTdesks Seminar Tables are composed of two groups, defined by distinctive leg bases (202 and 205 series legs). Both styles, however, are available in a great range of sizes and color combinations.

Add your choice of CPU Holder. (Optional)

CPU-BRG
The Brig™ provides asset security for standard tower CPUs, plus complete access to connections and drives. Hangs in-line with leg to save space.

CPU-LBG
The Li'l Brig™ gives security for small form factor CPUs. Space saving design. Complete access to drives and connections.

CPU-EZC
EZ-Cinch™ holds CPUs of any size with two adjustable nylon web straps. Hangs in line with leg. Complete access to drives and connections.

DR Seminar 202 Tables

202 Series: DR Seminar 202 Series Tables have a rectangular top with fold down, removable 10" modesty panel. The legs are black, offset-T shaped, tubular steel legs with wire management holes (2" diameter, 14 gauge steel, black nylon bullnosed end caps, wire management door optional), 1" diameter

levelers. Each table comes with a 6 outlet power strip, 1" x 3" J style wire management channel (12 amp rated). The top is finished with laminate and PVC trim, modesty panel finished with melamine and PVC trim. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

HorizonLine™ Computer Tables

For laptops and wide screen LCDs, with flipIT® installed, or power data ports

Single HorizonLine™ flipIT® Table
flipIT® display support system
EZ Cinch™ CPU holder (order separately)

DHL-722630-K23
Double HorizonLine™ flipIT® Table
72w x 26d x 30h
flipIT® FIK-23 for 16:9 aspect ratio Vesa compliant
LCD monitor with case width up to 23"
EZ Cinch™ CPU holder (order separately)

HorizonLine™ with flipIT® puts everything the user needs to see and touch right up front. Keyboard trays are at ideal height for use: 28" from the floor. CPU holders attach to the leg bracket, keeping the CPU available for access to connections and drives, yet out of the user's knee space.

THL-922628-L18-5
Triple HorizonLine™ flipIT® Table with flipIT® laptop safes
92w x 26d x 28h

All HorizonLine™ Tables share these specifications:

- MDF top with contoured front and back edges, squared side edges, 3D thermofoil finish
- 10" fixed modesty panel, matches top finish, radius corners and squared edges
- Tubular steel base legs; vertical wire chase
- 6-outlet power strip with 10-ft cord, 12 AMP rated
- 1-inch x 3-inch J-style wire management channel (standard), WireWonder™ cable management system (optional)
- Legs configured for 1" steel floor glide levelers, or locking casters, designated -LC
- Model number gives dimensions: Width x Depth x Height
- Order CPU holder separately. Choose Brig, Li'l Brig, or EZ Cinch to suit

HorizonLine™ Monitor Lift Tables

Position screens for optimum visibility.

DHL-722930-RKF-LC
Double HorizonLine™
Monitor Lift Table
72w x 29d x 30h
Monitor Lift LCD Arms
Optional EZ-Cinch™ CPU
Holders & Locking Casters

SHL-362930-RKF-LC
Single HorizonLine™ Monitor
Lift Table
36w x 29d x 30h
Monitor Lift LCD Arms
Optional EZ-Cinch™ CPU
Holders & Locking Casters

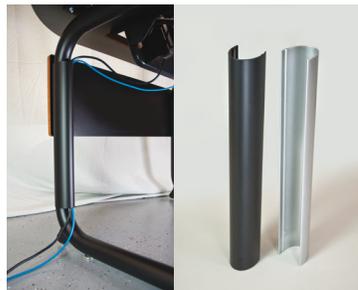

Horizon Line Monitor Lift Desks feature a fully-articulating monitor arm. Allows user to adjust monitor—up to 24" 16:9 wide screen LCD—in any position for the best comfort and line of sight. To personalize the space for collaboration, monitor positions include above desk surface or semi-recessed, forward, back or side to side.

HorizonLine™ Specifications

- MDF top with contoured front and back edges, squared side edges, 3D thermofoil finish
- 10" fixed modesty panel, matches top finish, radius corners and squared edges
- Tubular steel base legs; vertical wire chase • 6-outlet power strip with 10-ft cord, 12 AMP
- 1-inch x 3-inch J-style wire management channel (standard), WireWonder™ cable management system (optional)
- Legs configured for 1" steel floor glide levelers, or locking casters, designated LC.
- Multiple CPU storage options available: EZ-Cinch™ shown

CPU-STOREIT
StoreIT™ Storage Cubby
Steel, black powdercoated
box with adjustable width
is suspended using CPU
holder. Shown with EZ
Cinch™ CPU holder,
purchased separately.

WM-WMCSnap Chase™ Cable Manger
Aluminum channel, finished black or
silver, snaps onto C legs or MacTable™
legs to provide covered wire
management from floor to desktop and
modesty panel.

WM-WWC12 **WireWonder™ Cable Manager** is
an option to consider for managing lengths of AC
and DC power cords found at opposite ends of a
transformer. The transformer stows easily in the
channel. Surface mounts to vertical or horizontal
with wood screws.
12" long x 1.5" x 3" ID.
(305mm x 38mm x 76mm)

HorizonLine Tables

HL Series: HorizonLine Tables have contoured front and back edges and squared side edges. The tables can come with a flipIT kit. The legs are C-shaped, coped, tubular, steel legs with vertical wire chase, black or silver powder coat finish and black nylon ball nose end caps, 1" levelers. Each table comes with a 6 outlet power strip with 10' cord, 1" x 3" J style

wire management channel (12 amp rated). The top is finished in wood-grain or color Surf(x) 3D scratch resistant thermofoil, matching 10" modesty panel (inside is finished in black). The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

iLid flip Computer Tables

iLid Flip Computer Tables, Singles and Doubles

iLid monitor mechanism is based on a friction hinge that holds the monitor at any desired angle up to 120 degrees.

- * Use with VESA compliant LCD monitors: maximum monitor size 21" w x 16" h
- * Full 10.75" usable desk space in front of iLid gives freedom to use computer and text materials together.
- * CPU holder options: EZ Cinch (shown), Li'l Brig, Brig with leg mounting brackets. Order CPU holder separately.
- * 26x8 retractable keyboard tray or storage shelf options
- * Includes PD-FC707 power strip with 3 power outlets, 1 powered USB port for charging devices, 12 AMP rating with 10' 14-3 power cord with right angle plug
- * Large capacity 24" Neat Links wire management channel mounted to modesty panel.
- * High performance, institutional grade surfaces: Options for 3D thermofoil with contoured edges or high-pressure laminate, PVC edge trim
- * iLid top is black or matching (specify)
- * Optional locking casters for easy mobility.

iLid Tables

IT Series: iLid tables contain the iLid monitor mechanism (friction hinge holds monitor at desired angle up to 120 degrees, maximum monitor size 21" w x 16" h). There is 12.75" usable space in front of the iLid. Tables either have a keyboard storage area or a 26" x 8" keyboard/mouse tray. Table includes one PD-FC707 power strip per user (3 power outlets, 1

powered USB port for charging devices) and one 24" Neat Links wire management channel per user. The top surface is finished in either high pressure laminate or thermofoil. Tables come with 1" steel floor leveling glides or casters. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

MacTable™

Industrial design that makes the most of Apple's genius.

The WireWonder™ Cable Manager lets you place small components, such as power supplies, in its 2.5" x 3.375" channel. Mount a power strip above it and daisy chain power from desk to desk. Excess wire is easily wrapped around WireWonder's "mushroom tops."

MacTable's legs provide a stable base, just like the iMac stand, itself. The congruent angles work on the levels of function and esthetic. The user's angle of view is demonstrated, too. The low screen position prevents neck and eye strain. With open sight lines, presentations and demonstrations using other methods are possible.

A computer table with a pencil tray, and enough space on either side of the iMac to park the keyboard and mouse out of the way. Simple and elegant.

It's easy to stow the keyboard and mouse on the iMac support shelf. If you are using the Apple® Cinema Display, a Mac mini® and monitor power supply can sit neatly on the shelf, as well.

Mac Tables

MC Series: Mac Tables have a steel monitor well which adjusts 6" to 9" below top surface and include a cover for the monitor well to create a flat top surface and a 10" modesty panel. The legs are C-shaped, tubular, steel legs (70 degree angle, 2" diameter, 14 gauge steel, no wire management holes in legs, black nylon bullnosed end caps) with 1" levelers. Each table comes with a 3 outlet strip with one powered USB port and 10' cord, WireWonder Cable Manager

(18" long, mounted to inside of modesty panel), wire management access openings in monitor pan. The top is finished in Surf(x) 3D scratch resistant thermofoil, modesty panel matches top, legs powder coated in mercury (dark silver), monitor pan powder coated in white or mercury. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Nesta™ Laptop Tables

With UL approved modular wiring

Nesta™ Flip Top Tables support laptop use for classroom, training room or conference room. UL certified modular power is a quick connect system for fast set-up and mobility. Nesta™ Flip Top Tables work perfectly as modular conference tables, and may be set up in different spaces for other uses.

Nesta™ Flip Top Tables with Polyurethane Contoured Edges

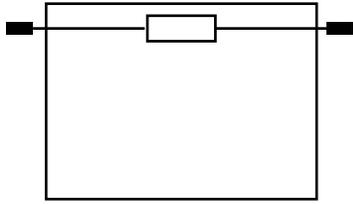

Fine furniture detail, hardened for institutional use. Tops finished in high pressure laminate with PURtech® Polyurethane color thru cast comfort edge. Edges are molded to HPL top so it becomes one integrated piece. PVC edge banding is applied with exacting fit and finish. Available in a range of colors.

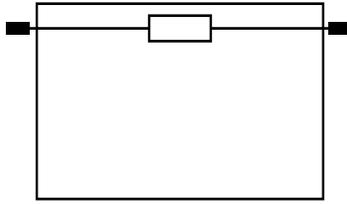

Nesta™ table widths are sized for DaisyLink™ Modular Wiring

DaisyLink™ permits fast deployment and storage. Supports laptops in the classroom with glitch-free power distribution. No more dead batteries! Nesta™ Laptop Tables may be purchased without the Villa™ power/data ports and

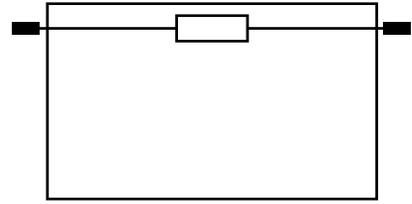

DaisyLink™ modular wiring system, so that you may receive the flexibility and storage benefits of the table when power and data wiring are not required.

NSF-722628-VFS
Nesta™ Table with Villa™ & DaisyLink™
72" w X 26"d X 28"h

Nesta™ Laptop Tables simply plug together. Your classrooms will be pre-wired for the Villa™ and DaisyLink™ modular wiring system, so power cables just plug in and tables connect together.

DaisyLink™ Modular Wiring conducts power from your installed wall outlet to a row of tables. Room layout drives electrical service specifications. We collaborate to deliver an engineered, plug & play solution.

Data cables are routed separately, but connect at the same locations as power.

Neat Links wire management channel included.

Nesta Tables

NS Series: Nesta Tables have a rectangular top with contoured edges; tops lift up for easy transport and storage. The table can come with or without the Villa Power Port (each Villa Power Port contains 2 power outlets (110V AC) and 2 Daisy Link Cables, UL listed). The legs are single column, arched base, tubular steel legs with wire management holes (2" diameter column: 14 gauge steel, 1.5" diameter main bars: 14 gauge steel, wire management door optional). All

Nesta tables come with locking casters and a 1" x 3" J style wire management channel (12 amp rated). The top is finished in wood-grain or pattern Surf(x) 3D scratch resistant thermofoil, modesty panel matches top, inside of top and modesty panel are black, legs are powder coated in black or silver. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Pi[®] Collaboration Tables

Pod-based System with Universal Design and Freedom of Arrangement

with flipIT[®] Laptop Safe[®]
FIL-18
US Patent No. 7,757,612

with flipIT[®]
FIK-19 for LCD Monitors
US Patent No. 7,784,412

Pi[®] tables are designed for flexible arrangements. The curved sides of the tables nestle into each other to form rows, clusters and arcs.

Add the flipIT[®] FIK-19 for VESA compliant LCD monitors with case width up to 18.8", or the flipIT[®] FIL-18-5 Laptop Safe for laptops up to 16" wide. Choose floor glides or locking casters for mobility.

Pi tables may be ordered with or without flipIT[®] FIK-19 Rotating LCD Display Support System

PIR-422630-K19

Concave arc on user's right.

PIL-422630-K19
Pi tables with flipIT[®] FIK-19 LCD stations.
Concave arc on user's left.

Pi Tables

PI Series: Pi tables have contoured top and edges. One end of the table has a concave end, the instructor tables have two convex ends. Tables can come with a flipIT kit. The 28" height is perfect for using a laptop or keyboard on the table top. The legs are C-shaped, coped joint, tubular, steel legs with vertical wire chase (2" diameter), black or silver powder coat finish, 1"

levelers. Each table includes a 6 outlet power strip with 10' cord, 1"x3" J style wire management channel (12 amp rated). The top is finished in wood-grain or color Surf(x) 3D scratch resistant thermofoil, matching 10" modesty panel. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Quint Tables

Essential for Collaborative Learning Environments

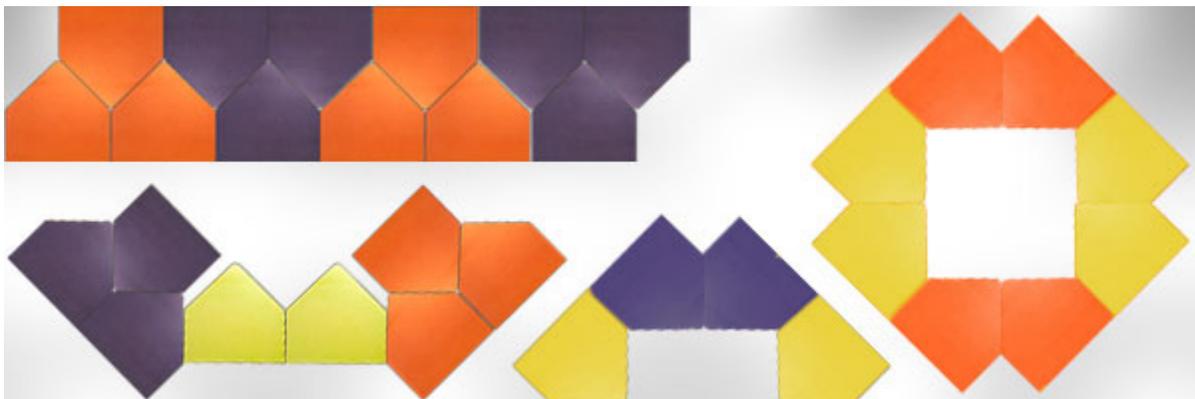

Mosaic tile arrangement is the inspiration for Quint's five-sided top. In contrast to forms with even numbered sides, the five-sided shape allows a different freedom in creating forms and shapes for group interaction.

5 sided top

Fixed Height or
Height Adjustable
X base

Build collaboration groups in flexible arrangement by alternating groups of three, putting four together, or putting together side by side to build larger groups. In fact, Quint tables can work individually and arranged in groups that model natural personal space. They don't have to fit tightly together; they can be arranged by simply bringing them near each other.

Quint Tables

Quint Series: Quint tables have a pentagon shape with a small footprint. An endless variety of configurations is possible. Alex X-base (3" round steel column, 18" x 18" aluminum base) or Ergo2 X base (2.75" square tubular steel column, 18" x 18" X base), locking casters; top finished with high-pressure laminate and PVC trim, base powder coated in black

or silver. The tables are 24" w and either 29" high or variable height. In the item number P stands for pentagon and VH stands for variable height.

Item Number	Short Description	MSRP

Trapeza Tables

Collaborative Classroom or Conference Solution

Trapeza's unique shapes combine to make a fresh landscape to help people team, communicate and empower creativity. The table elements are available at two fixed heights or with the Escal8 lift roller adjustable height base to serve multiple functions. Taller tables can be placed along walls or in small arrangements to be used as serving tables, or as centerpieces to tables used for sitting arrangements.

Tables come with or without power and USB charging ports.

Trapeza tables arranged to form a conference table with raised hexagons and side tables.

Trapeza Tables

Trapeza Series: Trapezoid shaped tops with ally legs or Escal8 lift roller base (19.69" adjustment range); zero, one or two Cove power and charging stations (each unit has 1 power receptacle, 2 USB charging ports, 9' cord); top finished in wood-grain or color Surf(x) 3D scratch resistant thermofoil or high-pressure laminate with PVC edge trim, base

powder coated in black or silver. The size of the table is the middle 6 digits of the item number (in inches): WxDxH. VH stands for variable height.

Podiums and Casegoods

Multi-Media Podiums

FP Series Podium for semi-recessed LCD monitor position. Works well with iMac®, too!

General Specifications:

- Top finished in choice of wood grain or color laminate
- Base is 19mm fused melamine or high pressure laminate (specified)
- Edge banding 3mm PVC • Side access grommets, 80mm
- 6-outlet power strip with 10-ft cord, 12 AMP rated
- Available in 30", 36", 54" and 60" widths, 26" depth, 42" height
- Optional heavy duty casters

flipIT Podium with optional lift up utility shelf. Plenty of storage for AV. Bay can be outfitted with optional rack rails.

Laptop Podium with open shelf storage and top-mounted power/data port.

The MSS Series stand-up computer podiums integrate an LCD monitor below a tinted and tempered monitor window in the worksurface to eliminate any obstruction of the line-of-sight between instructor and student. The worksurface area is always totally clear to accommodate printed teaching materials and notes.

Desktop Series Podium shown with optional grommet-installed monitor arm for use with LCD displays. Please note that heavy-duty casters are optional—be sure to specify these and any other additions to support your technology,

Multimedia Podiums

M Series: MPLEX Series Multimedia Podiums come with either a single or double bay. Bay doors are locked and the bay contains a remote-switched, surge-protected 6-outlet power strip and side wire management grommets. The monitor or laptop can be placed on top or in a flipIT kit. You may also order a podium for a semi-recessed monitor position. The top

surface is finished with high-pressure laminate, base finished in melamine, 3mm PVC edge trim (includes bottom edge). A ventilation fan and heavy duty, locking casters are optional. All lecterns are 42" H. The size of the podium is the middle 6 digits of the item number (in inches): WxDxH.

Presence Podiums

Adjustable Height Mobile Laptop Computer Podium

The Presence Podium is height adjustable so every presenter is served with commanding stature. Contoured, solid top with hand holds. Laptop is served with data connections through flexible conduit.

Available with one or two pull-up shelves for document camera and projector stand (specify number of shelves desired). Rack mount storage bay. Cubbie holes for books, water bottles, small accessories. Electronic combination lock on user side, locking removable access door on reverse side. Shown with optional flexible conduit for base cabinet. 5" locking casters for mobility on any indoor surface.

flipIT® Convertible Desktops

Adjustable height, contoured, top with hand holds with flipIT® Products installed: L18 for Laptop Safe and K19 for flip monitor mechanism.

Presence Theater

The Presence Theater supports monitors up to 52". Pneumatic height adjustment places monitor above the seated crowd for easy viewing. Rack mount AV equipment bays behind sliding, locking doors. Two vented metal locking access doors on reverse side. Rolls on 5 inch casters.

Presence Series Podiums and Theater

PRS Series: Presence flipIT Multimedia Podiums have a height adjustable top, molded handles for easy transport and come with or without the flipIT laptop safe. The cabinet has a locking door and contains vertical rack rails with 18 spaces. Two storage areas on each side of the main bay can hold binders or other accessories. Podiums are available with one or two lift up shelves. Each podium comes with a remote-switched, surge-protected 6-outlet power strip, wire management conduit and side wire management

PRS Series: Presence Theater include a pneumatic monitor lift which adjusts 12" in height. The lift supports screens up to 52" diagonal. Molded handles allow for easy transport. The cabinet has dual locking doors; the right interior bay has vertical rack rails with 18 spaces. Two rear locking, vented, metal access doors for easy access to components. Casters are

grommets. Casters are standard (4" locking casters, chrome hub with rubber tread). The top surfaces and bottom panel are finished in thermofoil, base cabinet finished in laminate with 3mm PVC trim. Cabinet dimensions: 36"w x 26"d x adjustable height (37"-48"h), interior cabinet dimensions: 19.125"w x 18"d x 24"h, two open storage areas to each side of cabinet (top 4"w x 11"h, bottom 4" x 12.5"). The size of the podium (with shelves extended) is the middle 6 digits of the item number (in inches): WxDxH.

standard (3" locking casters, chrome hub with rubber tread). The top surface, bottom and side panels are finished in thermofoil, base cabinet is finished in laminate with 3mm PVC trim. Size: 60"w x 26"d x 30"h, right interior bay (with vertical rack rails) 19.125"w x 21"h x 16"d, left interior bay 14.5"w x 21"h x 20"d.

SPEX™ Media Cabinets and Carts

The modern electronic classroom has very specialized storage requirements. Certain equipment is used all the time requiring protected power and data input connections while other items need to be put away but kept close at hand. Software and documentation need to be stored in a secure yet accessible environment that provides protection for fragile media.

SPEX™ Storage and Support Components coordinate with SMARTdesks™ workstations, tables and lecterns and offer surface space for projectors, document cameras, shared printers and scanners and display and/or storage for equipment, supplies and media.

Modular components offer Integral Wire Management™ to reduce cable clutter and protect network connections. Locks (standard) provide added security for supplies, software and equipment and may be re-keyed in the field.

SPEX™ components are engineered to align with desks, lecterns and each other to provide the finishing touch to an integrated training environment. They are designed to offer safe storage for valuable equipment and functional utility for multi-purpose rooms where storage space is at a premium.

Use SPEX™ for an attractive and secure solution providing specialized support functions and storage requirements in the electronic classroom and distance learning environment.

SPX Series Storage Units

SPX Series: SPEX Series storage units are finished with high-pressure laminate on top, sides finished in melamine, 3mm PVC edge trim. Units have wire

management grommets on sides. The size of the unit is the middle 6 digits of the item number (in inches): WxDxH.

Video Teleconferencing

eMotion™ Motorized LCD Lift sets the tone for professionalism in HD Video Teleconferencing

The VTC Series eMotion™ Monitor Lift Credenza presents your screen in 30 seconds. The motor is operated by remote control or hardwired switch.

A beautiful form, an impressive function. Your telepresence / teleconferencing room centers around the HD conferencing LCD display. The eMotion™ LCD Lift Cabinet floats the Video Monitor above the cabinet top. The cabinet lid automatically opens and closes as the motorized LCD lift transports the HD Video, LCD or Plasma Screen into the desired position.

Wire management from the eMotion™ to the side cabinets is conducted through grommet ports on facing sides, hidden from view.

Mirror-image Side Cabinets store codec and other components. Cable management keeps IT access easy and organized.

MVC Series Podium with locking storage and locking casters for mobility. flipIT® FIK-19 supports monitors with case width up to 19.25".

Video Teleconferencing Cabinets and Podiums

VTC Series: The Video Teleconference Credenza accommodates screens up to 62" diagonal. The top lid opens and closes automatically using an electric lift mechanism with a remote control or a hardwired switch. The screen raises to full height in 25 seconds. The credenza comes with integrated cable management in rear, rear side grommets which align with the side cabinets, a WireWonder23 Cable Manager and 6 outlet power strip. Outside dimensions: 61" w x 22" d x 48" h, inside dimensions 59" w x 11" d x 40" h.

VTC Series: The Video Teleconference Equipment Cabinets are mirror images, designed to sit to either side of the credenza. Each has two adjustable shelves, rear openings for cable management, an inside wall grommet that aligns with the Video Teleconference Credenza. Each cabinet also has a WireWonder23 Cable Manager and 6 outlet power strip. Outside

dimensions: 23" w x 23" d x 36" h, inside dimensions 20" w x 19" d x 30" h.

MVC Series: The Multimedia Video Teleconference Podium comes with or without a flipIT rotating LCD display support system (patents pending). Each podium has a 26" x 8" keyboard/mouse tray with integrated mouse fence and wire management pass through, locking bay doors, remote-switched, surge-protected 6-outlet power strip mounted in bay, and integrated horizontal wire management (80mm wire access grommets). The top surface is finished with high-pressure laminate, the base is finished in melamine, and all edges have PVC trim. The podium's style matches that of the VTC credenza and cabinets and podiums come with heavy duty, locking casters. The size of the podium is the middle 6 digits of the item number (in inches): WxDxH.

Conference Tables & Table Systems

Collab™ Conference Tables

for Learning Studio Spaces, Media Center and Teleconferencing

Collab™ (short for “Collaboration”) are Learning Studio Pods—interactive conference tables shaped for the group dynamics of collaborative learning. These triangular tables—or Pods for Learning Studios—are springing up in universities across the nation and around the world. CBT SMARTdesks has been a proponent of the Learning Studio concept and spaces that make use of flexible student arrangement and multi-use computer and laptop desks, featuring genuine flipIT products.

Standard Configuration:

- 101" x 110" equilateral x 28" OAH
- Solid maple edges with contoured, reverse bevel.
- Center supported with 18" diameter 14 gauge steel column with 8"x 20" access panel door
- three 5" diameter column legs with 4" leveler support apexes.
- Concept Pop-up Power/data Port with 5" diameter stainless steel top, includes four 110VAC outlets and two telecom plates with two each (four total) RJ45 connectors.
- Finishes: high pressure laminate on MDF 1.25" thick top with complementary finished solid wood edge 1.25" x 2": maple. All metal powdercoated steel.

Collab-6™ Concerto & Six flipIT® Laptop Safes
6 stations, up to 9 seats.

Collab tables are also available without flipIT® Laptop Safes.

Collab features:

flipIT® Laptop Safe

Optional microphones for audio amplification and internet communication. Tethered laptop always connected to power and data.

Concept™ Power / Data Pop-Up

Power/data pop-ups support up to four guest laptops.

Collab™ Cable Management

Center column has 8x20 access hatch for cable. Cover removed.

Collab Table System

CLB Series: Collab interactive conference tables are shaped for group dynamics and collaborative learning. Tables come with or without flipIT kits installed. The center of each table has a pop-up Concept connector box with power and data connections. The center base is 18" in diameter with

an 8"x 20" access panel door. Each table has three Wire Wonder 18s for cable management. The top surface is finished in either high pressure laminate or thermofoil. Laminate tables have a wood edge. Tables are 101" x 92".

Exchange Table System

Collaboration can take many forms, and so can the exchange™ system. The elements are on locking casters so they can be easily placed in the space, adjust to changing situations, roll to store or move to different spaces in the facility. Elements have connectors to lock them together so they stay in place during active use.

The exchange™ hexagon is made up of 6 elements of the same kind, left or right. 6 left is shown. The desktop space to the left works as a place for text materials.

Each workstation has enough personal space for focused privacy without the need for partitions. Screens are angled for privacy.

Built for round circle meetings with open sight lines within the group, each exchange element becomes its own equalizing sphere of influence.

The exchange™ collab triangle is made up of 6 elements: 3 left and 3 right set up in mirror image.

This shape, lends itself to the formation of collaboration groups. People are drawn to the corners to huddle up, then have plenty of personal space when it's time to work independently.

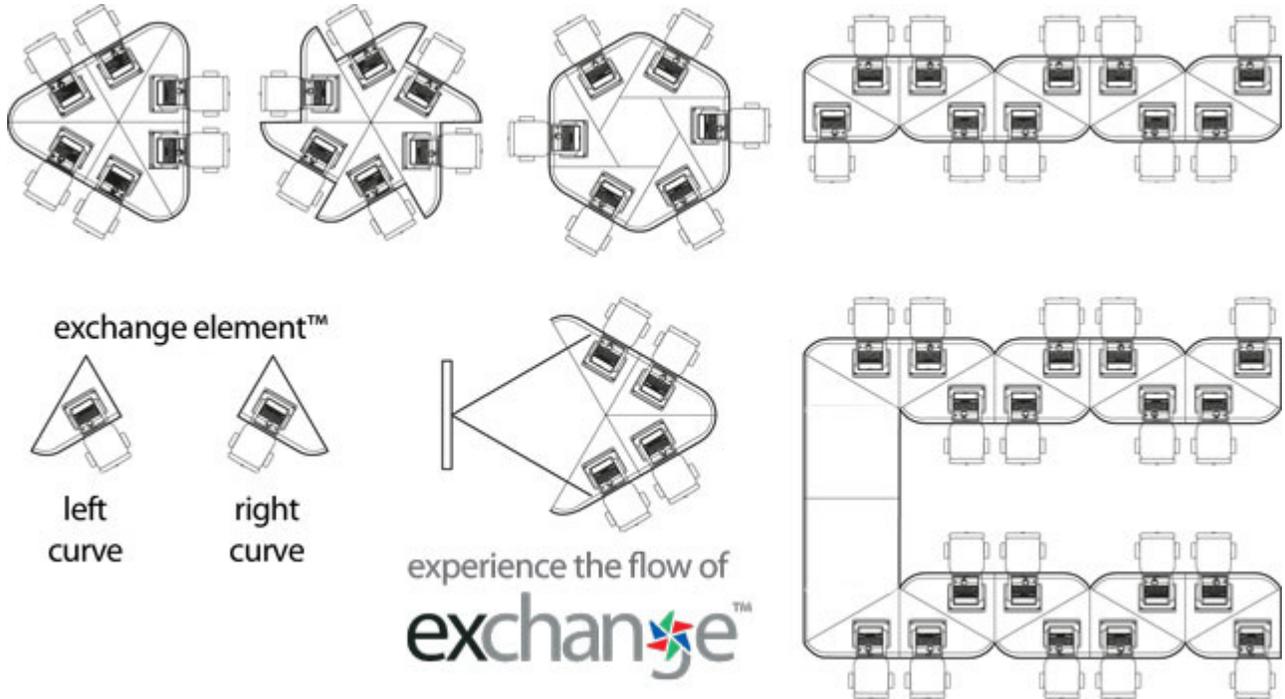

The exchange™ linear offset is made up of alternating exchange elements: 2 rights and 2 lefts to make a block of 4 elements. This can be made to layout in collaboration shapes with bridges to make U configurations. This setup is great for working in pairs, side-by-side, or in larger groups as a natural progression. When floor space is at a premium, this configuration goes a long way.

The exchange™ video collaboration studio is made up of mirror image exchange elements, two rights and two lefts.

It is shown with the Presence Theater PRS-602630-MXX, and is modeled with Lifesize® HD teleconferencing equipment, but will work universally with other leading VTC products.

How will you arrange your exchange?

the elements

Exchange™ elements are made in mirror image versions: curve to the left or right. This permits the various shape configurations for the installation.

Each exchange™ element can be a stand-alone computer or laptop table. Each is outfitted with a wire management leg; a steel-frame and mesh fabric modesty panel with wire management; PD-FC707 power supply with 3 power outlets and 1 powered USB Port for charging devices, 12 AMP rating with 10' 14-3 power cord with right angle plug; and locking casters. Optional equipment: genuine, patented flipIT® Convertible Workstation (shown) and fully-adjustable LeGrip™ CPU Holder (shown), or flipIT Laptop Safe®.

A set of four exchange elements can be arranged in a V shape for video teleconferencing, a linear shape for space saving collaboration or any number of other shapes.

A set of 6 exchange elements can be arranged in a hexagon, triangle, pinwheel or other shape. Contact us to find your perfect solution.

Exchange Table System

EXG Series: Exchange Tables are designed to encourage interaction. The tables are sold individually or in sets of 4 or 6. Sets of 4 can be arranged in a row or V shape. Sets of 6 can be arranged in a hexagonal, pinwheel or triangular shape. Tables come with or without a flipIT unit. Each triangular shaped table includes 3 table connectors; a steel frame fabric-mesh modesty panel with hook and loop wire management closure (black); three 2" post legs with

casters, aluminum snap chase for wire management; one 12' length of 1.25" Clean Cut wire management sleeve in black; one PD-FC707 power supply with 3 power outlets and 1 powered USB Port for charging devices. Some tables come with a LeGrip CPU holder. The top is finished in wood-grain or color Surf(x) 3D scratch resistant thermofoil, legs powder coated in mercury. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

The Origami of Interaction™

igroup
element

The iGroup® element is triangular with a curve on the user's side. Made in mirror image left and right, iGroup elements assemble to form a myriad of interactive shapes. Get creative with your classroom planning. Change up the arrangement for different group settings. Experiment with different shapes to find out what works best for your students and their learning styles.

Made up of three mirrored element pairs, the collaboration triangle shape is the new "classic" collaborative furniture shape. People naturally gather around the ends, but may also work side-by-side.

This pinwheel is made up of six left iGroup® elements. Each user area is well defined, but a simple shift in body language includes the neighbors. Angles naturally provide privacy for thoughtful study. Corners become conference areas.

The mirrored elements used for the Collaboration Triangle can be re-arranged to produce this Collaboration Leaf. This combination shape has a corner like a triangle, a side-by-side area, and the pinwheel's returns.

Some options to consider...

iGroup Table System

IGP Series: iGroup Tables are similar to Exchange Tables but are smaller in size and economically priced without all the options. The tables are sold individually or in sets of 4 or 6. Sets of 4 can be arranged in a row or V shape. Sets of 6 can be arranged in a hexagonal, pinwheel or triangular shape. Each triangular shaped table includes 3 table connectors; three 2" post legs with casters. The top

may be finished in high-pressure laminate with a PVC edge or wood-grain/color Surf(x) 3D scratch resistant thermofoil, legs powder coated in mercury. Tops may also be finished in dry-erase laminate for an extra charge. Monitor support, keyboard tray, modesty panel, power/data units and wire management are optional. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Motif Conferencing System

Modular Design Allows Many Configuration Choices.

Besides setting up in rows with the speaker in front as a traditional classroom, U-shape, face-to-face, and open-ended configurations are possible.

Your floor plan can take the shape that is best for your communication interaction in the room. The flipIT® LCD lets you easily and securely stow the computers so they are completely out of the way when not in use. This lets you take best advantage of the room's workspace potential.

- Recessed LCD flat panel displays retain an open line-of-sight between participants with a lower profile than laptops.
- Flip up monitors disappear from view when not needed leaving an unobstructed surface area.
- Locking keyboard drawers improve data and equipment security (locks options in FIK and FIH units).
- 4"-10" wide CPU bays.
- Recessed side panels and overhang at table ends increase leg room and allow additional seating.
- Wires and cables are hidden from view and protected from wear, abuse and possible damage.
- Single and double workstation units enable a variety of configurations.

Motif Table System

FT Series: Motif Conference Table Modules can come with a flipIT kit. Base panels are reduced in depth, and end panels are continuous across rows. CPU bays come in 10" width but can be reduced in width if necessary. Modules come with 1" x 3" J style wire management channel (12 amp rated),

wire management grommets on sides. The top is finished with laminate and PVC trim, base finished with melamine and PVC trim. The size of the module is the middle 6 digits of the item number (in inches): WxDxH.

Piano5™ HD Studio

The Ultimate Teleconferencing Experience

The technology that permits HD video communications over IP can now deliver on its promise of a human meeting experience. Thanks to a designed studio space, people are complemented by their surroundings. Lighting gives faces a natural appearance, free of gloomy shadows. The shape of the table promotes satisfying compositions that include the speakers without obstruction. Supporting data is displayed on screens in the users' personal space. Computers are housed with easy access, but without visual intrusion. Phones and controllers are stowed in the Piano's wire management well.

This HD Conference Studio is lit with two ceiling mounted lighting units. Balanced for HD video, provides even front lighting for natural looking faces. Remote control dimmer on XLR model. Light mounted to stand is effective when subjects are faced away from the ceiling light source, or for fill light anywhere on the set. May also mount to ceiling and directed to fill.

Piano™ Computer Conference

This conference room suite has at its centerpiece the Piano18 appointed with flipIT® 19 monitor supports for 20" diagonal wide screen monitors. To coordinate choose the MVC Series podium, the SPX Series mobile equipment stacker, and the VTC Series eMotion™ AV Credenza flanked by mirror image AV storage cabinets.

Piano Conference System

P Series: Piano Conference Tables are designed for visual interaction. The Solo table is a wedge shape, with a natural presentation locus at one end. The Duet table is a diamond shape (double wedge) with a presenter locus at each end. Tables lend themselves to teleconferencing as well as face to face interaction. The center lid raises to reveal the wire management

and storage area. Tables are available with and without flipIT units. The Sonata tables are finished in thermofoil. The Concerto tables are finished with a high pressure laminate and a contoured, stained wood edge. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Piatto™ Computer Conference

Contemporary lines. Genuine flipIT stations. Not a wire in sight.

For corporate training or meetings with interactive collaboration, Piatto™ unites the space with contemporary lines and fine furniture detail. Genuine flipIT® stations give the participants the option to clear the space when computers are not being used. Shown with full density for flipIT® station configuration. The location and number of flipIT® stations are optional, configured as you require.

Customize your table with a variety of top shapes and base options.

Boat shaped top with cube bases

Racetrack top with panel bases

Rectangular top with panel bases

Add power/data options for easy access.

Interface Two

Provides access to 8 power receptacles and 8 configurable telecom plates.

Electriwave Mini

Provides access to 6 power receptacles, 3 RJ-45 (cat 6), 1 - 15 pin HDVGA, and 1 mini-stereo.

Piatto Conference System

PT Series: Piatto Tables are available in three top shapes (boat, racetrack and rectangular) with a variety of bases. You may choose from a variety of edge profiles for the table. The tables come with and without flipIT units. The CineStage projector lift

is optional, as are connection boxes of all varieties. Matching podiums and storage cabinets are available. The size of the table is the middle 6 digits of the item number (in inches): WxDxH.

Quark™ & Qstar™ Mobile Conference

Mobile laptop workstations work independently or together, just like you do.

When was the last time you had this much fun just coming into a meeting space? Quark™ Mobile Laptop Tables can be used sitting or standing and are adjustable in one inch increments from 28" to 38". Quarks™ nest into the Qstar™ Mobile Conference Table. The Qstar™ provides power and data for the group.

Quark may be incorporated into an office space or a collaboration space that has areas for private thought. Qstar is mobile, and may be located in any open area for a meeting.

Qstars™ are made at sitting or standing height. Many are opting for quick meetings, standing up, to add energy to the interaction and to add a sense of action to the activity. Thinking on your feet, literally.

Quark Table System

Q Series: Qstar Docking Stations come at sitting height or standing height. Stations accommodate up to 5 Quark tables. Each Quark table can connect to the Qstar for power and data sharing. Qstar docking stations have five carpet casters (two locking); a center column with two wire access grommets and one telecom plate accessible under the star shaped cap (telecom plate ordered separately), 5 Seclusion units mounted under the top for docking each Quark table (1 power outlet (110V AC) and 1 RJ-45 cat 6 insert per Seclusion), 6 power outlets (110V AC) with 15 AMP Breaker. Stations are finished in Surf(x) 3D scratch resistant thermofoil; 40"W x 38"D.

Q Series: Quark Laptop Tables have molded cup holders, a molded pencil tray, and molded handles. The pneumatic center support adjusts the height from 28"-40" inches (locking at 1" intervals). Tables come with five carpet casters (two locking); one WireWonder Cable Manager (8" long) and either a FIL laptop safe or Top Notch Connector Box. Tables are finished in Surf(x) 3D scratch resistant thermofoil. 34" W x 33" D.

Vista Collaboration

Collaborative Learning Environment

Free-standing monitor mount wall and conference table. Individual computer workstations for video conferencing, teaming, and collaborative learning supported with interactive AV technology. Allows for open plan room setup, independent from facility walls for monitor mounting.

Cabling is routed through the keel under the table.
Access panel in the wall to reach cabling hidden inside.
Individuals push a button to show their screen on the monitor.

Featuring the HuddleVu Screen Sharing System

One HDMI box serves up to 4 users.

Individual boxes serve up to 7 users.

Vista Collaboration

The Vista Teaming Center consists of a tapered table secured to a set of trapezoidal walls. A large monitor can mount on the wall, and individuals can share their computer's screen using the HuddleVU screen sharing system. A variety of sizes and finishes are available.
