FLAME RETARDANT PROGRAM (CAL 133)

All seating manufactured by RFM is made to comply with California Technical Bulletin 117 and BIFMA F-1-1978 unless a customer's own material (COM) is used, in which case RFM cannot guarantee the flame retardant properties of the fabric.

RFM seating products can be ordered to meet California Technical Bulletin 133 (CAL 133). CAL 133 is a full composite burn test which was designed for furniture which is used in public and private buildings. This test does not specify how to construct any furniture; however it does tell how well each piece of furniture will perform under a controlled burn. The solution to this problem is to use a fire barrier between the fabric and the foam. This barrier will help extinguish the fire by smothering the flame.

For additional information regarding CAL 133 fully upholstered seating protection, please contact the California Bureau of Home Furnishing and Thermal Insulation.

For pricing and ordering information see the options page on pages 85-86.

RFM will not accept any C.O.M. orders which have to pass CAL 133.

For additional information regarding CAL 133 please contact RFM Customer Service at 800.447.5542 or sales@rfmseating.com
