90-400	Safety SCBA Light will give you visual contact for a minimum of 5 meters/ 16 feet in dense black smoke without a dazzling light. It is designed with safety in mind, easily mounted to your SCBA air cylinder. Your team will be able to locate and keep track of each other during maneuvers. Safety Light can also be used outside a smoke filled structure as a warning light for drivers approaching vehicles along with other similar uses. It can be seen for at least 200 meters / 220 yards in clear darkness. Uses 2 AA batteries for 35 hours. Endures head 570° for 4 hours and up to 1650° for 8-10 seconds. System is washable and stands rinsing with water when cleaning. Frame is made of stainless steel.	Nordic Safety	90-400	PPE	90-400	\$170.00	5.00%	\$161.50
90-450	Safety Light Reel 246 Feet of steel re-enforced light wire on a reel, powered by a 220V outlet or a 12V battery. The light wire is unreeled and carried with you into a smoke filled structure so you can easily leave a trail. Can also be used to rope off an accident area or as Ascending-Descending for rescue, commercial and sport divers. Charging time 24 hours, operating time on battery 12 hours. Max load on Light-Wire is 330 lb. Weight 35 lbs.	Nordic Safety	90-450	PPE	90-450	\$4,173.00	5.00%	\$3,964.35
