**RE:** Application for Preferred Source New Service:  
30 Gallon Universal Spill Kits and 55 Gallon Oil Spill Kits

ESD has completed its review of the application from NYSID for the addition of two sizes spill kits including goggles, gloves, bags, directions and a variety of absorbent pads, socks, and pillows.

ESD's research found small businesses that provide this service and sell to state agencies and municipalities. Therefore, it is determined that small businesses in New York State would be negatively impacted by the preferred source selling the 30 gallon universal spill kit and 55 gallon oil spill kit.

ESD objects to this request.
