**OGS Project # 934, NYSID Item D4734 50 Gallon Rain Barrel**

Rain Barrels are designed to collect rain waters, diverting the water and pollutants from entering sewage systems and waterways. The collected rain waters can be used for watering lawns, agriculture, etc. & conserving water. This product is made from 100% recycled material and features a spill control top, multiple overflows, flash overflow channel, a linking kit, and duel spigot access. Madison Cortland ARC will be the provider of this item which will be available to all State Agencies. Work for persons with disabilities will include the following: Preparation of the hose; measuring the hose, cutting it to proper length, inspecting for defects, packaging with screws and other accessories and seal in a bag. The raw material supplier for this item is Stone Harbor Waterworks of New Berlin, WI. It is anticipated that this commodity will provide jobs for 1 or 2 individuals with disabilities and annual sales volume of \$50,000.

This item meets the spirit of Executive Order #4.
