Glossary:

- Zero Emission Vehicle (ZEV): A vehicle that can be driven on battery-electric power alone, during which time it emits no tailpipe emissions. BEVs, PHEVs, and hydrogen fuel cell vehicles (FCEVs) are examples of ZEVs.
- Battery Electric Vehicle (BEV): An EV that runs entirely on battery power. BEVs have no tailpipe emissions.
- Plug-in Hybrid Electric Vehicle (PHEV): A hybrid EV with a drivetrain that can be powered by either battery-electric power or an ICE.
- Emergency Vehicles (exempt vs. non-exempt): Emergency vehicles are exempt from the mandate and per Vehicle and Traffic law, include "Every ambulance, police vehicle or bicycle, correction vehicle, fire vehicle, civil defense emergency vehicle, emergency ambulance service vehicle, blood delivery vehicle, human organ delivery vehicle, county emergency medical services vehicle, environmental emergency response vehicle, sanitation patrol vehicle, hazardous materials emergency vehicle and ordnance disposal vehicle of the armed forces of the United States." Vehicle & Traffic (VAT) CHAPTER 71, TITLE 1, ARTICLE 1 § 101.
- Light-Duty Vehicles: Vehicles with a gross vehicle weight rating (GVWR) up to 10,000 lbs.
- Level 2 Charger: A charging method that consists of connecting an EV into an installed station device requiring a 240 or 208-volt grid connection. Level 2 provides roughly 25 miles per hour of charging for light-duty vehicles.
- Level 3 Charger / Direct Current Fast Charging (DCFC): A high-power charging method that consists of connecting an EV into an installed station device. DCFC provides 180-240 miles per hour of charging for light-duty vehicles.
